

## CONTENTS

<i>Abdelrahman S. Ali , S. Siddharth, Z. Syed , Naser El-Sheimy</i> Particle swarm optimization algorithm based low cost magnetometer calibration .....	9
<i>Ali Almagbile, Jinling Wang, Weidong Ding , Nathan. Knight</i> Sensitivity analysis of multiple fault test and reliability measures in integrated GPS/INS systems .....	25
<i>Mohamed Attia, Adel Moussa , Xing Zhao , Naser El-Sheimy</i> Assisting personal positioning in indoor environments using map matching .....	39
<i>Krzysztof Bakula</i> Reduction of DTM obtained from LiDAR data for flood modeling .....	51
<i>Lukasz K. Bonenberg, Gillian W. Roberts, Craig M. Hancock</i> Using Locata to augment GNSS in a kinematic urban environment .....	63
<i>Hakim Boulaassal , Tania Landes, Pierre Grussenmeyer</i> 3D modelling of facade features on large sites acquired by vehicle based laser scanning .....	75
<i>Aleksandra Bujakiewicz, Piotr Podlasiak , Dorota Zawieska</i> Georeferencing of close range photogrammetric data .....	91
<i>Błażej Ciepluch, Peter Mooney, Ricky Jacob, Jianghua Zheng, Adam C. Winstanely</i> Assessing the quality of open spatial data for mobile location-based services research and applications .....	105
<i>Mahmoud Efatmaneshnik , Allison Kealy , Nina Alam , Andrew G. Dempster</i> A cooperative positioning algorithm for DSRC enabled vehicular networks .....	117
<i>Piotr Falkowski, Zenon Parzyński , Jacek Uchański, Łukasz Uchański</i> An attempt of the metadata standard creation for the technology of mobile laser scanning in Poland .....	131
<i>Alberto Guarnieri, Nicola Milan, Francesco Pirotti, Antonio Vettore</i> Motion estimation by integrated low cost system (vision and MEMS) for positioning of a scooter “Vespa” .....	147
<i>Norbert Haala, Dieter Fritsch, Michael Peter, Ali M. Khosravani</i> Pedestrian mobile mapping system for indoor environments based on MEMS IMU and range camera .....	159

<i>Ayman Habib, Ana P. Kersting, Ki Bang, Jiann Rau</i> A novel single-step procedure for the calibration of the mounting parameters of a multi-camera terrestrial mobile mapping system .....	173
<i>Ayman Habib, Eunju Kwak, Mohannad Al-Durgham</i> Model-based automatic 3D building model generation by integrating LiDAR and aerial images.....	187
<i>Beata Hejmanowska, Simon Kay</i> A new approach to DTM error estimation basing on Laplacian probability distribution function .....	201
<i>Dorota Iwaszczuk, Ludwig Hoegner, Uwe Stilla</i> Detection of windows in building textures from airborne and terrestrial infrared image sequences .....	215
<i>Małgorzata Jarzabek-Rychard, Andrzej Borkowski</i> Building outline reconstruction from ALS data set with a priori information .....	227
<i>Allison Kealy, Günther Retscher, Dorota Grejner-Brzezińska, Vassilis. Gikas, Gethin Roberts</i> Evaluating the performance of MEMS based inertial navigation sensors for land mobile applications .....	237
<i>Jakub Kolecki, Przemysław Kuras</i> Low cost attitude and heading sensors in terrestrial photogrammetry – calibration and testing .....	249
<i>Samira Kolyaie, Marjan Yaghooti, Gilda Majidi</i> Analysis and simulation of wireless signal propagation applying geostatistical interpolation techniques .....	261
<i>Karolina Korzeniowska, Małgorzata Łącka</i> Generating DEM from LiDAR data – comparison of available software tools .....	271
<i>Michał Kowalczyk</i> Evaluation of sequential images for photogrammetrically point determination .....	285
<i>Wenyang Liu, Jinling Wang, Jianguo Jack Wang, Weidong Ding, Ali Almagbile</i> Measurable realistic image-based 3D mapping .....	297
<i>Christian Lukianto, Harald Sternberg</i> Stepping – smartphone-based portable pedestrian indoor navigation .....	311

<i>Urszula Marmol</i> Use of Gabor filters for texture classification of airborne images and LiDAR data	.... 325
<i>Athanasios Mpimis, Vassilis Gikas</i> Monitoring and evaluation of rowing performance using mobile mapping data	..... 337
<i>Paweł Popielski, Zygmunt Wróbel</i> An attempt to optimize the process of automatic point matching for homogeneous surface objects	..... 351
<i>Kevin Sahr</i> Hexagonal discrete global GRID systems for geospatial computing	..... 363
<i>Burkhard Schaffrin, Sibel Uzun</i> Errors-in-variables for mobile mapping algorithms in the presence of outliers	..... 377
<i>Michał Strach, Grzegorz Lenda</i> Concept of measuring and calculation system, based on electronic clinometers to determine the geometry of railway track in the vertical plane	..... 389
<i>Charles K. Toth, Pirooska Zaletnyik, Sandor Laky, Dorota Grejner-Brzezińska</i> The potential of full-waveform LiDAR in mobile mapping applications	..... 401
<i>Artur Warchoń, Beata. Hejmanowska</i> Example of the assessment of data integration accuracy on the base of airborne and terrestrial laser scanning	..... 411
<i>Dorota Zawieska</i> Analysis of operators for detection of corners set in automatic image matching	..... 423
<i>Yueming Zhao, Milan Horemuz, Lars E. Sjöberg</i> Stochastic modelling and analysis of IMU sensor errors	..... 437
<i>Ming Zhu, Günther Retscher, Kefei Zhang</i> Integrated algorithms for RFID-based multi-sensor indoor/outdoor positioning solutions	..... 451
