

CONTENTS

Vol. 17a

Adamczyk J., Będkowski K.
Representation of selected landscape objects in airborne laser scanning data.....1

Badurska M.
Integration of radar and optical data for land cover mapping.....11

Będkowski K., Górski D.
Use of archive aerial photographs for reconstructing documentary profile
in Leon Wyczolkowski Nature Reserve of the Old Polish Yews, Wierzchlas.....23

Bernasik J., Mikrut S.
Automated correction of angles orientation for nonmetric digital cameras.....33

Bielecka E.
INSPIRE metadata implementing rules.....43

Błaszczak M.
Evaluation of accuracy of ASTER DEM generation in Svalbard region
with the use of PCI GEOMATICA53

Böhm A.
The role of landscape in creation of spatial order.....63

Borkowski A.
Surface breaklines modeling on the basis of laser scanning data.....73

Borkowski A., Józków G.
Correctness evaluation of the flakes based filtering method
of airborne laser scanning data.....83

Borkowski A., Tymków P.
Land cover classification using airborne laser scanning data and aerial images.....93

Buczek A., Marmol M.
Debate on cartography – lights and shadows of geo-information.....105

Bujakiewicz A., Kowalczyk M., Podlasiak P., Zawieska D.
Verification of hypotheses for relative correspondence of the sculpture parts
by matching their contact surfaces.....115

Cisło U.
Three-dimensional visualisation standards for spatial information in the Internet –
practical aspects.....127

<i>Chmiel J., Fijałkowska A., Woronkiewicz Ł.</i> Digital analysis of VHR satellite image for obtainig land cover data – object and pixel-approach.....	139
<i>Czechowicz A., Mikrut Z.</i> Selection of sub-images for aerial photographs matching purposes based on gradient distribution and neural networks.....	149
<i>Drzewiecki W., Głowienka E., Tokarczyk P.</i> Feasibility study for use the KH-7 satellite imagery for land-use change analysis in urban areas.....	159
<i>Drzewiecki W., Wróbel A.</i> The assessment of the reliability of impermeable surfaces photo interpretation using high-resolution satellite images.....	171
<i>Dudzińska-Nowak J.</i> Suitability of laser scanning in the Southern Baltic coastal zone research	179
<i>Dygaszewicz J.</i> GIS in the public statistics	189
<i>Ewiak I.</i> Determining the utilisation range of Resurs-DK satellite data in photogrammetric workflow.....	199
<i>Ewiak I.</i> Russian satellite data vs. contemporary commercial systems.....	209
<i>Fijałkowska A.</i> Feasibility study of automated metodology for Cross-Compliance requirements control.....	217
<i>Głazewski A.</i> Image model discretisation in a hybrid visualisation of the reference data.....	229
<i>Głowienka E., Michałowska K.</i> The possibility of environmental changes monitoring using GIS tools for Slowinski National Park	241
<i>Gołuch P., Borkowski A., Józków G.</i> The accuracy of airborne laser scanning data received from the SCALARS system.....	251
<i>Górski J.</i> Location and role of cartographic representations in municipal websites	261
<i>Gryboś P., Mikrut S.</i> Analysing parameters of automatic matching processes on aerial images.....	271

<i>Hejmanowska B.</i> NMT (GRID/TIN) analysis - OKI data example.....	281
<i>Hejmanowska B.</i> Comparison of HYPERION and ALI satellite imagery classification.....	291
<i>Iwaniak A., Kopańczyk B.</i> Building of spatial data infrastructure – interoperability of catalog services.....	301
<i>Izdebski W.</i> Feasibility study for integration of the State Geodetic and Cartographic Resource with other geo-informational resources.....	313
<i>Janczar E., Głażewski A.</i> Organization and essential problems of the INSPIRE directive implementation among tasks and competences of Polish geodetic and cartographic service.....	321
<i>Jankowicz B.</i> Analysis of unmanned air low-height photogrammetric flights for quick collection of geoinformation	329
<i>Jędrychowski I.</i> Airborne laser scanning of Cracow.....	339
<i>Jędrzycka R.</i> Internet-based registering of image regions in a photogrammetric flight.....	347
<i>Karwel A.K.</i> Estimation of DEM accuracy on the area of Poland based on the elevation data of the LPIS project.....	357
<i>Kolecki J., Tokarczyk R.</i> Automatic identification of the AGH test-field targets using MATLAB software.....	363
<i>Kolondra L.</i> The centenary of Hans glacier front position change measurements (S-Spitsbergen).....	375
<i>Kosiński K.</i> Application of structural features in the Landsat ETM+ image in object classification of landscape-vegetation complexes.....	385
<i>Kowalski P.J.</i> Importance of geographic data integration in mashup web services.....	395
<i>Kubacka D., Barszczyńska M., Walczykiewicz T.</i> Problems related to elaboration of environmental data for spatial analyses of Polish rivers.....	405

Kulesza Ł.
Automatic building detection and modelling with the Terrascan software.....415

Vol. 17b

Kuraś B.
Using GIS as a special tool in valorisation of natural conditions
made for land management and spatial planning.....425

Kurczyński Z.
Technical, organisational and economical impact of introduction
of digital aerial camera into production.....437

Leśniak A., Porzycka S.
Detection of the vertical ground displacements in mining areas
using PSInSAR radar satellite interferometry451

Lis N., Mikrut S., Guzik M.
Possibilities of using freeware software for building GIS database
for Tatra National Park.....463

Michałowska K.
Spatial and temporal analysis of environmental changes
in the Slowinski National Park between 1964 and 2004.....473

Michałowska K., Głowienka E.
Integration and processing of multitemporal data in GIS environment485

Michałowska K., Głowienka E., Mikrut S.
Technology of processing archival aerial photos for changes analysis
of Slowinski National Park landscape.....495

Mikrut S., Mikrut Z.
Neural networks in automatic matching processes on aerial images.....505

Mikrut S., Tokarczyk R., Huppert M.
Video Stereo Digitizer for Windows – the conception of the system517

Mitka B.
Usability of terrestrial laser scanners for the process of documentation
and modeling of historical objects.....525

Mularz S., Drzewiecki W.
Risk assessment for soil water erosion within the Dobczyce reservoir area
based on numerical modeling results.....535

<i>Olszewski R., Buczek A.</i> Harmonisation of TOPO and NMT components of Topographic Data Base – feasibility study.....	549
<i>Olszewski R., Kołodziej A., Berus T.</i> Development trends in sozological and hydrological thematic databases.....	559
<i>Olszewski R., Kołodziej A., Gnat M.</i> Generalisation of reference spatial data - concept and implementation study.....	567
<i>Osińska-Skotak K.</i> The importance of radiometric correction in satellite images processing.....	577
<i>Pachelski W., Parzyński Z., Zwirowicz A.</i> Conceptual models of geographic information - implementation aspects.....	591
<i>Pawlik P., Mikrut S.</i> Comparison of the accuracy of selected method of air image matching	603
<i>Perski Z., Mróz M.</i> Application of SAR interferometric (InSAR) methods for the study of natural earth surface displacements in Poland. GEO-In-SAR project.....	613
<i>Pędzich P.</i> Utilisation of Digital Cartographic Studio for creation topographic map graphics based on Vmap vector data.....	625
<i>Piekarski P., Mikrut Z.</i> Log-Hough based image representation for the neural classifier.....	639
<i>Pirowski T., Bobek G.</i> Various formulas for pan-sharpening of multispectral IKONOS images – statistical and visual assessment of results.....	649
<i>Porzycka S., Leśniak A.</i> Radar image processing using permanent scatterers technique.....	661
<i>Preuss R.</i> Considerations of photogrammetry development in Poland.....	671
<i>Pyka K.</i> Applications of wavelet transform in noise detection and removal from raster data.....	681
<i>Pyka K., Twardowski M.</i> Free software in geoinformatics education.....	691
<i>Różycki S.</i> The potential and limitations of using large block satellite images.....	699

<i>Różycki S.</i> 3D City Models –generation and applications.....	709
<i>Rzeszotarski D., Sawicki P., Ostrowski B.</i> Prototype stereovision system of Machine Vision type – operation and accuracy.....	717
<i>Sawicki P., Ostrowski B.</i> Evaluation of the measuring potential of Kodak DCS Pro 14n (13.5 MP) SLR digital camera	729
<i>Sawicki P., Zwolenik S.</i> Processing of video and thermal images in the Vision Plus v. 2006 authors' software.....	739
<i>Szablowska-Midor A., Szukalska (Pająk) A.</i> Profile, predispositions and preferences of the UNIGIS e-students	749
<i>Szubert M.</i> Geoinformatics in geomorphology - a case of geomorfological studies in the Wieluń and Częstochowa uplands.....	759
<i>Tokarczyk R., Kolecki J., Tokarczyk P.</i> Application of mobile digital camera in 3d visualisation of shrine.....	769
<i>Twardowski M.</i> Stereo viewer of images acquired from sparse database.....	781
<i>Wężyk P., de Kok R., Szombara S.</i> Using the object-based image analysis (GEOBIA) in the classification of the very high resolution satellite images of Krakow municipality.....	791
<i>Wężyk P., Matyja W.</i> Studying the dynamics of changes in Niepolomice primeval forest based on orthophotomap generated from archival aerial photos of 1949.....	801
<i>Wróbel A., Blicharz M., Lisowska-Woś A., Kubica M.</i> Proposal for simplified metrical documentation of historic monuments.....	811
<i>Wróbel Al., Ortyl Ł.</i> Georadar and thermovision method for the acquisition of geodata on subsurface voids..	821
<i>Zabrzaska-Gąsiorek B., Borowiec N.</i> Determination of airborne laser scanner data range in process of true orthophoto generation	831
<i>Ziobro J.</i> Precision and reliability of GPS-coordinates of projection centers in real aerial triangulations.....	841
