

CONTENTS

<i>Beluch J.</i> Precise accuracy evaluation of transformed coordinates after having included the Hausbrandt corrections.....	1
<i>Boroń A., Borowiec. M., Wróbel A.</i> The development of digital technology concerning surveys of heritage objects based on experiences of AGH Department of Photogrammetry and Remote Sensing Informatics.....	11
<i>Bujakiewicz A., Preuss R.</i> Evaluation of approaches for automatic reconstruction of 3D building models from photogrammetric data.....	23
<i>Bydłosz J., Cichocinski P., Dębińska E.</i> The modelling of real estate databases.....	35
<i>Chojka A.</i> The adaptation of the MDA technology to build the geoinformation system at the commune level.....	47
<i>Chrobak T., Kozioł K.</i> Digital cartographic generalization of buildings layer in creating data of the Topographical Database.....	59
<i>Cierniewski J.</i> Laboratory measurements of directional spectral reflectance of soil surface at various roughness and illumination levels.....	71
<i>Dzikowska T., Nowak R.</i> The assumptions of the integration of cadastral and planning databases and the commune's register of area development plans.....	81
<i>Eckes K.</i> The conception of a continuous and homogenous documentation of the urban space and its application in crisis management.....	89
<i>Ewiak I.</i> The multisensor satellite triangulation.....	101

<i>Falkowski P., Parzyński Z., Uchański J.</i> Project preparatory work for the model compilation of a technical standard for the architectural object survey with the use of a terrestrial laser scanner.....	111
<i>Gocał J., Bałut A., Kocierz R., Kuras P., Ortyl Ł., Owerko T., Rączka A., Strach M., Szyra R.</i> Precise structure vibration measurement using a ground-based interferometric radar.....	123
<i>Jaśkowski W., Józwik M., Szafarczyk A.</i> Quasi-continuous measuring state of the strains of strains in the pump station building wall and its direct neighbourhood.....	143
<i>Karsznia I.</i> Settlement and road network generalization in the general geographic database using the clarity environment.....	155
<i>Kijowski A., Młynarczyk Z., Słowik M., Zwoliński Z.</i> Ground penetrating radar identification of periglacial structures on morainic plateaus.....	169
<i>Kijowski A., Słowik M., Rączkowski W.</i> The application of ground penetrating radar in the identification of archaeological structures – a medieval town of Szamotuły.....	181
<i>Koc W., Specht C., Nowak A., Jurkowska A., Chrostowski P., Lewiński Ł., Bornowski M.</i> Preliminary research results of ASG-EUPOS network availability during surveying of Kościerzyna-Kartuzy railway route.....	193
<i>Kocierz R.</i> The automation of cylindrical tank volume measurement process based on ISO -7507 standard.....	201
<i>Kośka T.</i> An attempt at characterizing the local real estate market potential on the example of the city of Łódź.....	213
<i>Królewicz S.</i> Digital correction of aerial photographs vignetting.....	219
<i>Kurczyński Z., Preuss R.</i> Requirements to source data for true-ortho generation.....	229

<i>Kuśnierek K.</i> The use of KML and PostgreSQL/PostGIS database system to visualize vector datasets on the Internet.....	241
<i>Latoś S.</i> Cooperation between AGH University of Science and Technology in Krakow, Faculty of Mining Surveying and Environmental Engineering and southern Poland local authorities during establishing 3 rd class horizontal control.....	251
<i>Lewandowicz E.</i> Graph trees in access analyses	269
<i>Marmol U.</i> Detection of individual trees based on the combination of lidar data and photogrammetric data.....	279
<i>Mialdun J.</i> The photogrammetric determination of soil dislocations during a geotechnical laboratory experiment.....	287
<i>Mikrut S.</i> The usefulness of sub-pixel feature extraction algorithms in selected photogrammetric cases.....	299
<i>Młynarczyk Z., Słowik M.</i> The conception of GPR metrics atlas for creating spatial databases of natural environment components	309
<i>Ortyl Ł.</i> Quantitative evaluation of the possibility and accuracy of determination of road structure layers thickness with the use of RAMAC/GPR georadar equipment.....	323
<i>Owerko T.</i> Examination of the accuracy of RTK GNSS receivers based on ISO 17123-8 standard.....	341
<i>Poręba M.</i> Modern methods of earth mass volume determination.....	351
<i>Pyka K.</i> How to assess the photometric quality of the orthophotomap ?.....	363
<i>Pyrchla J., Kowalewski M.</i> Accuracy of hydrodynamic models of the Baltic Sea and safety in the Polish SAR responsibility area	373

<i>Siejka Z.</i> The use of GNSS measurements for the determination of basic realization network coordinates in mining impact areas.....	387
<i>Sitek Z., Jachimski J., Bernasik J., Pyka K.</i> The history of development of the Geoinformation, Photogrammetry and Environmental Remote Sensing Department.....	399
<i>Strach M.</i> Surveying of railroads and related facilities and developing results for the conventional railway modernization.....	411
<i>Tokarczyk R., Tokarczyk P.</i> The application of GIS analysis for the detection of selected anatomical parts of human body for the posture defects examination.....	423
<i>Trembecka A., Kwartnik-Pruc A.</i> Geodetic and legal problems connected with the preparation of the documentation for road projects in Krakow.....	437
<i>Wężyk P., Sroga R., Szwed P., Szostak M., Tompalski P., Koziol K.</i> The application of terrestrial laser scanning for determining the selected trees and forest stand parameters.....	447
<i>Wyczalek I.</i> Studies on the sensitivity of digital terrain model to the impact of its environment.....	459
