CONTENTS

Introduction

Bac-Bronowicz J.
Foreword XIII
Ney B.
Division VII Earth and Mining Sciences, Polish Academy of Sciences – activity connected with geoinformation XVII

Vol. 13 A
CARTOGRAPHY AND GEOGRAPHIC INFORMATION SYSTEMS
Papers and presentations

Adamczyk J.
Characteristics of the users needs of the geographical information systems about the nature protection Areas 1
Andrzejewska M., Baranowski M.
Geovisualisation in the "Electronic Atlas of Environment in Poland" 11
Bac-Bronowicz J., Borkowski A.
Possibilities of determination of values of median rainfall in multi-variant reference unit 21
Chrobak T.
The method of generalization data objects linear 33
Dyras I., Dobesch H., Grueter E., Perdigao A., Tveito O. E., Thornes J. E., Van Der Wel F., Bottai L.
The use of Geographic Information Systems in climatology and meteorology, COST719 39
Dyras I., Serafin-Rek D., Łapeta B.
Application of GIS technology to satellite and meteorological data presentation and analysis 47
Fagiewicz K.
Spatial diagnosis of the state of the natural environment of the particular areas in Silesia province (on the basis of a multi-criterion analysis of a sozological and digital map at a scale of 1:50 000) 57
Gajderowicz I.
Local co-ordinate systems 65
Gotlib D.
Topographical Database via topographical map production 69
Górski J.
Role of cartographic representations in advertising on example of tourist town maps 77
Iwaniak A.
Methodology of managing GIS project 87
Kozak J.
Accuracy of global land cover datasets: example of Global Land Cover Characterization Data Base 97

Krzywicka-Blum E.
Modern map use 109
Kuraś B.
Technology of GIS as a complex tool in studies of natural environment valorization on example city of Bielsko-Biała 119
Leszczyńska M.
Role of GIS in region tourism promotion 129
Lewiński St., Poławski Z. F.
Application of geoinformation tools for evaluation of information content on IRS-1C satellite images 135
Łaszczuk A.
Geoinformation as a quality paradigm of building of information superiority in security geography research 145
Madej P.
Interactive internet maps – examples of using GIS for generation SVG based solutions 155
Makar A., Naus K.
Obtaining of data for digital sea bottom model 163
Olszewski R.
Using of neuro-fuzzy cellular automata for cartographic modelling 171
Osińska-Skotak K., Zaczek-Peplinska J.
Aspects of generating of digital terrain model based on survey measurements (Łącka Dune example) 181
Poniży L.
An attempt of spatial comparative analysis of the state of the natural environment and the incidence rate of some selected civilisation-related diseases (as exemplified by the city of Poznań) 189
Selby R., Mikrut S.
Latest tools in PCI Geomatica for orthorectification and pan sharpening of very high resolution satellite imagery 199
Siekierska E., Richardson D., Muller A., Francis K.
Visualization of Integrated Knowledge for Sustainable Development Decision Making – the Natural Resources of Canada Approach 209
Slinkina O. A., Bychkov V. A., Sukhinin A. I.
Determination of criteria for burned area identification in Nizhnee Priangarye territory using GIS 219
Stankiewicz M.
From a terrain object to its representation on a map and in a database 225
Szubert M.
Digital elevation model of the base quaternary surface on the Woźniki-Wieluń upland 233

Ustrnul Z., Czekierda D.
Construction of the air temperature maps for Poland using GIS 243
Werner P.
Monte Carlo Simulation of the development of internet and radiocommunication in Poland (based on geographic potential models) 255
Wężyk P., Goś M.
Geoinformation tools application for the plant cover monitoring of the Niepołomice Forest..... 265
Wysocki P.
Optimization of the method of the modernization of the land and buildings register ... 277
Zaczek-Peplinska J.
The development of presentation methods of dune movement monitoring results (based on Mierzeja Łebska)..... 285
Żarnowski A.
E-language and generating symbols of E-alphabet based on „text-graphics" transformation..... 293

Vol. 13 B
PHOTOGRAMMETRY AND REMOTE SENSING
Papers and presentations

Będkowski K., Miścicki S.
The use of digital photogrammetric station (VSD) in forest stands inventory..... 301
Borkowski A.
Modelling of terrain surface involving discontinuities from laser scanner data 307
Boroń A., Borowiec M.
Irregular block of wooded mountainous area archival photographs aerotriangulation..... 315
Bujakiewicz A., Zawieska D., Kowalczyk M.
Three dimensional modelling of architectural structure 325
Cierniewski J., Gdala T.
Influence of sky radiance distribution on soil image in the optical domain..... 339
Dąbrowska-Zielińska K., Gruszczyńska M., Hościło A., Stankiewicz K., Kowalik W.
Satellite-derived vegetation indices for Biebrza wetland..... 349
Gołuch P.
Digital Terrain Model, Digital Terrain's Cover Model and digital orthophoto as sources data to hydrodynamic modeling..... 361
Grzesik I., Grońska J., Wróbel Al., Wróbel An.
Interpretation of thermograms of constructions with use of stereoscopy 371
Jędryczka R.
New technology in exchange and storage information and photogrammetric data ... 379
Kosiński K., Kozłowska T.
Application of NDVI index and directional filtration in grassland recognition and changes of grassland habitats and communities analyzing 387

Kowalewski M., Krężel A.
System of authomatic registration and geometric correction of AVHRR data 397
Królewicz S.
The image of sand surface on air photos in varying viewing and observing conditions 409
Marmol U.
Derivation of Digital Terrain Model (DTM) from elevation laser scanner data 419
Mierzwa W., Rzonca A.
Surface scanning as a new method of recording and interpretation of architecture details 427
Mozgawa J., Norman H.
Image maps of the protective forests in the forest district Pisz 435
Mularz S., Wróbel Al.
Investigation of temperature distribution on a terrain surface using thermovision imaging 441
Mycke-Dominko M.
Forest fire risk categorisation derived from satellite images 451
Sawicki P.
Simultaneous calibration of a digital camera Kodak DC4800 in close range photogrammetric point measurement 457
Tokarczyk R., Brodzińska M.
Photogrammetric reconstruction of Odwach on Main Market Sqare in Cracow based on archival photographs 467
Wężyk P., Świąder A.
Image Web Server – the platform to share digital orthophotomaps through internet 477
Wężyk P., Wertz B., Waloszek A.
Hiperspectral scanner AISA (*Airborne Imaging Spectrometer for Applications*) – tool for forest ecosystem data gathering 485
Wrzesień M.
Analyzing structure of forests near Warsaw on the basis of satellite imagery and aerial photographs 497
Zawieska D., Podlasiak P.
The analysis of the factors affecting precision of measurement by projection moiré system 507
